

CONFESSES SHE KILLED HUSBAND

Jealous Wife Threw Acid on
New Haven Man "to Spoil
His Good Looks"

New York, Aug. 2.—Dismaying of keeping her husband faithful to her when she discovered him, Mrs. Alexandra Sokolowsky, widow of Frank Sokolowsky, of New Haven, Ct., prominent organizer in the American Federation of Labor, poured carbolic acid over her husband's face as he slept, and, on awaking, she had killed him.

Frank Sokolowsky was arrested here for the murder of her husband whose body was found at his home in New Haven on the morning of June 28. He was apprehended despite a disguise.

Speaking through an interpreter, she is a Russian by birth and speaks little English, she told her story to the police.

My husband was a big handsome man, she said. "He was successful. We were married nine years ago and were happy for three years. Aloud, my daughter, came and we were together and working for each other."

I killed my husband on June 28. He died about 5 o'clock a. m. He had been away since June 24. I knew that he had been with another woman. He was good looking and such a great lover of women that I thought surely he would leave me.

He had come home a little after midnight and when I found him lying on his back with another woman, I told him that I had found a letter in his pocket, he told me that I must leave him alone and that he was going out again.

I often had been thinking of disgusting him so that I could have him. But I never had thought of killing him. For I could not have lived without him. When I got the last letter that was addressed to him and had a girl friend read it to me, for it was in English, I was determined to do what I had planned. A friend of mine told me that Frank was intending to leave me and marry a girl in Brooklyn.

He fell in a taxi and I took a pint bottle of carbolic acid and threw it on his face. I threw 2 different times. I told him, I also threw some all over his body. He sprang from the bed with a scream and said he was burning up all over. My daughter was in the next room and didn't hear.

I ran to the street. I told a man there that I wanted him to run for a doctor. He said he was a doctor and came in. He said my husband was dead. I was in a daze. I ran out again and went away.

I wandered a long time and ended up in Canada, and stayed only a few days there. I went back to New Haven and stayed there for a week. But they were looking too closely for me so I went back to Canada and stayed two days.

Then I came to New York about two weeks ago and got employment with a private family. Now I am arrested and told my story. I know what will become of my little girl."

WOMAN IS PREPARING
TO BECOME A RABBI

Cincinnati, Aug. 2.—Miss Martha Rasmussen is preparing herself at the Hebrew Union College here to become a rabbi, which may force an answer to the question, "Shall women enter the Jewish ministry?" asked by Joseph L. Loebl in the latest issue of The American Israelite. According to Jewish historians, there can find no precedent for Miss Rasmussen's plan.

90-YEAR-OLD BRIGHTON MAN MISSING TWO DAYS

Report was made at Pemberton square today that eighty-year-old Martin Haines of No. 203 North Harvard street, Brighton, left home to go to town early Saturday morning and had not been heard from for

twenty-four hours. He was described as five feet five, with gray hair and mustache, wearing a blue suit with gray cap and soft white shirt.

Conference on Forestry
Washington, Aug. 2.—The American Forestry Association announced today that a forestry and print paper conference would be held at New London, N. H., on August 14, 15 and 16. Representatives from both the United States and Canada will be present. The objects of reforestation and protection of forests will be taken up at the conference.

No Time To Argue

Whether we can or whether we can't

It's time for action---time for every man and young man who needs any clothing to buy it right now when we **MUST SELL**. For us, this medicine is pretty bitter---but so is the situation.

Blame us for lack of judgment if you want to. Or blame the railroads or the manufacturers for late deliveries. It makes no difference now. We're overloaded--swamped --with a prodigious stock of fine clothing with only a little while left to dispose of it. So out it goes without any regard for cost or loss.

Kuppenheimer's \$65, \$60, \$55, \$50 Suits are now **\$37.50**

\$45 and \$40 Suits are now **\$27.50**

No need of urging men to buy this kind of merchandise at these prices. It's like finding money for every lucky purchaser.

Who's Who in "The World and His Wife"

Don Julian.....Montagu Love
Tedora (his wife).....Alma Rubens
Ernesto.....Gaston Gluba
Tom Severo (Julian's brother).....Pedro de Cordoba
Mercedes (his wife).....Margaret Dale
Don Alvaro.....Charles Gerard
Alma.....Mrs. Allan Walker
Directed by ROBERT G. VIGNOLA.

Watch for This Story in Motion Pictures

"The World and His Wife," shown to be seen in motion pictures at the best theaters, is a Compton production released as a Paramount Aircraft picture from the play by Charles Frederic Niddling, founded on the dramatic verse of G. K. Chesterton.

SCREEN VERSION NOVELIZED

By JANE M'LEAN

PATIENCE a moment as though to give added weight to her utterance, Mercedes went on:

"I speak of the universal tragedy of three, the middle-aged husband, the young wife and the other man, young again."

"It is no exuberant wicked that is ridiculous," Tedora's words came down in a rush, "and what is your real object?"

"I have told you, they say you can fight the whole world—can't you?"

"They tell you, they say they?"

"The world—everyone."

"And you expect me to perform myself because the world chooses to wish to be just? No, no, I am only with you and my conscience."

"You are young—you think you can fight the whole world—can't you?"

"It isn't what you do, it's what the world thinks you do, it's what people say you do."

"You came to this house to believe a rumor," said Tedora, once again master of herself. "You want to believe it, you sit in there there is only good and betrayal where there is only trust. Am I to have my house decorated by your vice suspicions and my heart broken by your insinuations? No, better far you should leave this house and leave Ernesto in it."

"Ernesto is the voice of Julian?"

"No, he is the voice of Julian's husband," said Tedora, "and my husband wants you," said Mercedes.

"He is the voice of Julian's husband," said Tedora, "and my husband wants you," said Mercedes.

"He is the voice of Julian's husband," said Tedora, "and my husband wants you," said Mercedes.

This gown of gray georgette crepe, though not entirely of lace as many semi-evening frocks now are, trims itself with deep flounces of silver lace.

A yellow dress of organdy. Snug corsage and full tunic are in one over an underslip of the same fabric. On the yellow straw hat are streamers of blue ribbon.

When a Girl Marries

By Ann Lisle

TOWARD noon of the day after Carl Rook's breakfast dinner, Daisy Gooden telephoned me. It was the first time she had ever taken the initiative where I am concerned, but I didn't deceive myself into thinking it indicated a growing friendliness for me on the part of Kate's little sister.

"Would you lunch with me this noon, Mrs. Harrison?" she asked, adding hastily in anticipation of my hesitation to let her spend money on me. "Really you'll be paying for your own lunch out of the five dollars and a half I won from the big bridge last night. I want to see you and I can well afford to treat today, you see."

"All right, I'll meet you, but I have something to do in the afternoon," I answered, with a mental reservation about what take the lunch hour, despite the fact that I remembered the old days when I resented always having to be the guest.

When I met Daisy I ordered only cold eggs and saw in maximum with coffee to top it off. Her eyes twinkled. It was easy to see that the habit of lunching and happiness might easily light Daisy's smile and drag little else to pleasant pretenses.

"In case I wasn't bluffing about those party this is," she said, "I really, you order the cheapest and most filling things you can find. Really, Mrs. Harrison, you're a regular guardian angel."

A Direct Question

I fell my face crimsoning. It might have been more amusing if it hadn't been so annoying.

"I want to be your friend, Daisy," she said, trying not to have it sound grim and stolid.

Daisy's eyes widened and stared at me.

I guess you would, too—if you knew how," she said, "and I think you would have gone the same way even if you hadn't come along. Well, after all, no one can do better than their best. Now your best is a recommendation to me."

"I'm going to Mr. Mason's office after lunch to make final arrangements about taking charge of his opinion study."

"How are you doing this?" I asked.

"First of all—I like Mr. Mason," Daisy, looking a man isn't a legitimate business position and respect for the future—

"I can't know, of course, unless you choose to tell me," Daisy said, "but you might come to be literary about some day. You have a splendid position, now. You're about to come into personal touch with the best of the country's ability and willingness to work hard."

"But the housewife who would like to see her family most first learn to cook it correctly. Salt in the proportion of one level tablespoon to two quarts of water. When you cook with the rice, some folks like very little salt pork cooked with the tomato, onion, etc. and served with the rice. If your family does not like rice, look to your method of cooking it. The directions given in the beginning of this article give excellent results."

"Of course, a diet of rice and milk, if persisted in for a great length of time, might not only become tiresome but it might also be injurious for bodily requirements. But for a month or so, for those who confess to overindulgence in the richer foods you will find it a welcome change."

"Any your standing sponsor for a character. Ordinarily Mr. Mason says, 'I can't see anyone who will take charge of a place like his opinion study to give him a hand for at least five thousand dollars, for course I can't do that. And I wouldn't feel I could ask you to."

"I'll do it," I said gravely. "What are we to discuss?"

"Any your standing sponsor for a character. Ordinarily Mr. Mason says, 'I can't see anyone who will take charge of a place like his opinion study to give him a hand for at least five thousand dollars, for course I can't do that. And I wouldn't feel I could ask you to."

A Dramatic Film Romance Featuring ALMA RUBENS

ABOUT OUR GOOD FRIEND Greenwald

Copyright, 1920, by The Loewer Syndicate

GREENWALD.

VARIATIONS—Grune-wald, Greenwald, greenwood.

RACIAL ORIGIN—German, also English.

SOURCE—Descriptive of Locality.

THE last named of the variations of this family name gives you the clue to the name. It is the only name of English origin in the group. The rest are of German development.

For the larger number of families in the United States bearing the various forms of this name trace it back to German origin, for the name had a wider development in Germany than in England. This is ascribed to the fact that even those of the period of family name formation took place considerably later in Germany than in England, most sections of that country were less developed than the others.

But if you'll just tell him how you feel about me—"

Her words made me start.

And what must that be? I asked, interrupting in turn.

"Why you're shown how it is. You've taken me about me. You got me this dress. I know it's all for Kate—but this is for her, too. I want to get away. I want to work for Mr. Mason. He'll give me my way out and I'll make it. I'm getting at it. He's got to get away. You're only to say a word. Will you? I'll get it. It depends on me," I repeated dully.

"You say 'My chance. Do I get it?'"

When Lamps Smoke

When lamps smoke, remove the wicks from the burners and boil the burners for half a day in a solution of half a teaspoonful of baking soda to a quart of water. Use an old kettle, as it will injure a good one. After boiling for at least four hours, rinse thoroughly in clear water, dry perfectly, put in new wicks and the lamps will burn clear and bright. Never throw away the burners unless they are broken. This treatment cleans out all tubes and makes them like new.

SOLDIER IS HELD FOR MURDER

Devens Infantryman Accused as Slayer by Loominster Policeman's Widow

Loominster, Aug. 2.—Bergeant Harold Vandear, attached to the 13th Infantry, Camp Devens, was arrested charged with the murder of Patrolman Charles A. Thomas, following information obtained from the wife of the victim after a two-hour third degree.

Mrs. Thomas, who had apparently enlisted the accused man, with whom she admits she had been on friendly terms, broke down under the police grilling when two letters signed by Vandear were found concealed in her home.

Vandear, after being placed under arrest by the military authorities at the request of the local police, was brought to the Loominster police headquarters under a heavy guard, where he was identified by Mrs. Thomas as the man who had been in her home at the time of the shooting.

Patrolman Thomas was shot three times as he entered his home at No. 117 Highland avenue his Saturday night. Two bullets lodged in his abdomen and the third penetrated both lungs.

Mrs. Thomas at first denied all knowledge of the crime. A first questioning by the police failed to break the woman's story. With the finding of Vandear's letters, and worn by the morning grilling of the police, Mrs. Thomas broke down.

Vandear and Mrs. Thomas met early Saturday evening on Beacon street, according to the woman's story. He followed her to her home against her will, she said.

Two minutes after she had entered her home Vandear followed. Thomas, who had been on duty in North Loominster, and who is believed to have maintained a suspicion regarding his wife's association with the soldier, entered the home five minutes after Vandear.

When the patrolman paid his unexpected visit to his home he found Mrs. Thomas and Vandear in the parlor. A heated argument ensued and various accusations were made.

Mrs. Thomas says that her husband pulled his revolver to fire but that the latter fired first. Thomas, with two bullets in his abdomen, staggered from the front room to the kitchen where he fell to the floor. Another shot was then fired it is alleged by Vandear as Thomas lay on the floor. The third bullet, and the one which resulted in instant death, entered "the right shoulder, fractured both bones, and lodged in the victim's back."

Quit Laxatives, Purges; Try NR

NR Tonight—Tomorrow Fast Night

It is a mistake to continually dose yourself with laxative pills, cathartics, oil, or other such medicine. It weakens the force, and the action of the bowels, and the system is not able to get rid of the waste matter.

Try Nature's Remedy (NR) tonight to overcome your constipation and get your system in such shape that daily purging will be unnecessary. You can do so by using a few boxes of Nature's Remedy (NR) Tablets and have one each night for a week or so.

NR Tablets do much more than merely cause pleasant easy bowel action. They stimulate the system, cleanse the digestive tract, and stimulate the organs of the body to get the nourishment from all the food you eat. Give you a good, hearty appetite, strengthen the liver, overcome indigestion, purifies the blood and bowel action and gives the whole body a thorough cleansing out.

This accomplished you will not have to take medicine every day. An occasional NR tablet will keep your body in condition and you can always feel your best.

Try Nature's Remedy (NR) Tablets and prove this. It is the best and only one per box, containing enough to thoroughly cleanse the system and overcome your constipation.

Nature's Remedy (NR) Tablets is sold, guaranteed and recommended by your druggist.

Stocks Irregular in New York at Noon; Money 8%; Market Active; Foreign Exchange Steady

EARLY STRENGTH FOR BOSTON

Local List Became Irregular During Forenoon; Bull and Bear

Strength characterized the list when the Boston exchange began business but selling soon became as successful as buying and the list market became irregular. The forenoon movement was mixed with of the time. The rise continued during the morning however. Boston & Maine advanced 1/2 and New Haven 1/2. They were the only New England values advanced by the rate ruling. But, there were more active than usual. Trading was quiet on the whole.

Among issues to advance a point were United Fruit and United Fruit. While fractional gains were made by American Telephone, Western Union, Drug, Chemical, International Paper, Northern Paper, and Western Union. United Fruit was the only one to advance a point and a half.

There were a number of points in the list. Among them were United Fruit, American Telephone, Western Union, Drug, Chemical, International Paper, Northern Paper, and Western Union.

The list was a mixed one. There were a number of points in the list. Among them were United Fruit, American Telephone, Western Union, Drug, Chemical, International Paper, Northern Paper, and Western Union.

Boston Financial Notes

The list of Boston financial notes was a mixed one. There were a number of points in the list. Among them were United Fruit, American Telephone, Western Union, Drug, Chemical, International Paper, Northern Paper, and Western Union.

U. S. TRADE BALANCE

CUT HALF A BILLION

No trade figures published by the government within a decade have shown more serious situation than those for the fiscal year ended with June. The annual interest was due to the decrease in the trade balance. The trade balance was cut by half a billion dollars. The trade balance was cut by half a billion dollars.

Large Export of Cotton

Based upon the government's report of cotton exports for the first seven months of 1920, the total export of cotton for the first seven months of 1920 was 1,227,575 bales. The total export of cotton for the first seven months of 1920 was 1,227,575 bales.

Wheat Outlook Is Good

The wheat prospect is excellent and August begins with every indication that the country's grain yield will be large in 1920. The improvement is growing and has been remarkable this summer. The government estimated based upon July 1 conditions was for a crop of 1,227,575 bales.

Wool Receipts and Shipments

Stagnation of the wool trade is not new to this country. From January 1 to July 23 last shipments aggregated 52,127,266 pounds against 52,127,266 pounds for the corresponding 1919 period, while receipts were 230,318,666 pounds compared with 225,225,225 pounds for the corresponding 1919 period. Totaling both 450,645,932 pounds.

Mail Order Business

While it is said that Sears, Roebuck & Co. sales decreased about 10 per cent in July it is also stated that those of Montgomery Ward & Co., which is the second mail order house, increased 25 per cent.

German Mark Options

Our special booklet describes conditions in Germany written by eye witnesses. It also shows how from 1920 to 1920 can be controlled for six months for a small cash payment.

New England Telephone & Telegraph Company

W. R. DRIVER, JR., General Manager.

DATE DECISION HELPS RAILS

But Profit Taking Soon Reduces Gains by the Carriers and Equipments

By W. H. ROSS.

Stocks were irregular in New York at noon but the market was rather weak. The price trend was downward in the second hour. Railroads showed gains but were held by heavy profit taking.

The market was active during the first hour, transactions totaling about 25,000 shares for the period. The price trend was downward in the second hour. Railroads showed gains but were held by heavy profit taking.

The market was active during the first hour, transactions totaling about 25,000 shares for the period. The price trend was downward in the second hour. Railroads showed gains but were held by heavy profit taking.

March 1960 JOHN H. RABLIN, Chief Engineer.

MEASURES THAT WOULD CURE MOST OF THE TROUBLES AND TENDENCIES WHICH DISTRESS AND ALARM US TODAY

- (1) To nominate for the Presidency by direct nomination and to elect by popular vote.
- (2) To elect the Cabinet officers and make them responsible to Congress.
- (3) To deprive the President of the power of patronage; to put all public offices nearly as pos-

- sible under Civil Service, and have appointments made by a committee of Congress.
- (4) To elect Federal Judges, including the Supreme Court Justices, by popular vote.
- (5) To apply the Initiative, the Referendum and the Recall to national matters.

Good-bye to Archbishop Mannix

If Love of Country Is a Crime, He's a Criminal.

Copyright, 1920, Star Company.

When you feel anything, you say it strongly. Archbishop Mannix of Australia was born in Ireland. He has travelled around the world to work in Australia, where duty sent him, but he took with him memories of Ireland, and in Ireland he left part of his heart.

Arriving in this country, he told what he thought about Irish conditions, temperately. He expressed his belief that Mr. Wilson's pleasing remarks about independence for little peoples should be made realities, and IN IRELAND first of all.

His talk was not incendiary, he did not advise, but rather deplored violence, but he DID demand for Irishmen, and for the Irish nation, the freedom that our ancestors demanded and got for this country one hundred and forty years ago.

England says that Archbishop Mannix shall not be allowed to land on any British island, Ireland included.

Archbishop Mannix says, "Nevertheless I am sailing for Ireland. England has power to stop me, but I have power to go, and am going."

Archbishop Mannix is a quiet, elderly man, tall, thin, with clothes that show signs of wear. His cheeks are sunken, he looks more like a portrait of some ancient ascetic than an Australian product of today.

His manner and speech do not seem dangerous. But England is a good judge of danger. And there was in the tone and the eye of the Archbishop, discussing Irish matters with studied carelessness, a certain determination easily recognized. You would have seen it in 1776 in this country. You can see it in a thousand places today in Ireland. It is a power not easily conquered. As long as it remains alive, liberty is alive.

When a man on shipboard is told that he must not land when he arrives, must stay where he is and go back, it gives him pleasure to know that he will be welcome when he does come back.

Not Exactly a Republic

Government Ship as Private Yacht Proves It

Copyright, 1920, Star Company.

Is this exactly, in all ways, a Republic? No. Not exactly. Mr. Franklin D. Roosevelt, who expects to be elected Vice-President on the Democratic ticket, MEANS to be a democratic individual. He is an ambitious, earnest, pleasing young man.

But when he goes on his vacation to Eastport, Maine, he goes on the *Destroyer Hatfield*, a fighting ship belonging to the American Navy and to the AMERICAN PEOPLE.

That ship, carrying one passenger up to the coast of Maine and back, employs many men, and BURNS UP ON THE TRIP ENOUGH COAL TO LAST AT LEAST FIFTY FAMILIES ALL WINTER. ENOUGH COAL TO SOLVE THE PROBLEM OF SOME LITTLE MANUFACTURER WHO, FOR LACK OF COAL, FINDS IT HARD TO KEEP HIS MEN AT WORK.

It may hurt Mr. Roosevelt's feelings to say it, but what right has a man to burn up coal, using a ship in the United States Navy to carry his one hundred and sixty-five pounds of weight to a summer resort place? Is a first-class ticket, with a compartment in a Pullman car not good enough? The people agree to pay an Assistant Secretary of the Navy a certain salary, they do not agree to supply him with a warship for commuting purposes.

You will say that Mr. Roosevelt only initiates the President of the United States and others in using warships as pleasure craft, but that doesn't make it any better, and doesn't make this any more of a real republic.

Thanks, but a Singed Cat Is Usually Cautious About Fire

If there is to be a peace parley between Russia and the other European Powers, France wants Uncle Sam to sit in.

Since he has been faintly fighting Russia for two years, directly and by proxy, by Executive orders, it would be awkward for him to decline.

But it would be still more awkward for him to accept. For if the parley didn't bring peace you may be sure that no American Congress would send another army across to pull foreign chestnuts out of the fire. Hence all he could give would be advice, and on that the world just now it fed up.

We gave lots of advice at Versailles. We should be chary of repeating that. Let the instigators of these inglorious wars on Russia get out of their predicaments as best they can. Next time, if there is to be a next time, let them fry their own fish. The United States has had its lesson.

A Prophecy Which Has the Uniform Backing of History

The United States Steel Corporation has been one of the world's greatest successes in making steel for the public and profits for its stockholders.

BUT—it has worked a majority of its men twelve hours a day, seven days a week, with only a few days of rest in a year.

It has also denied their right to organize in their own way for collective bargaining.

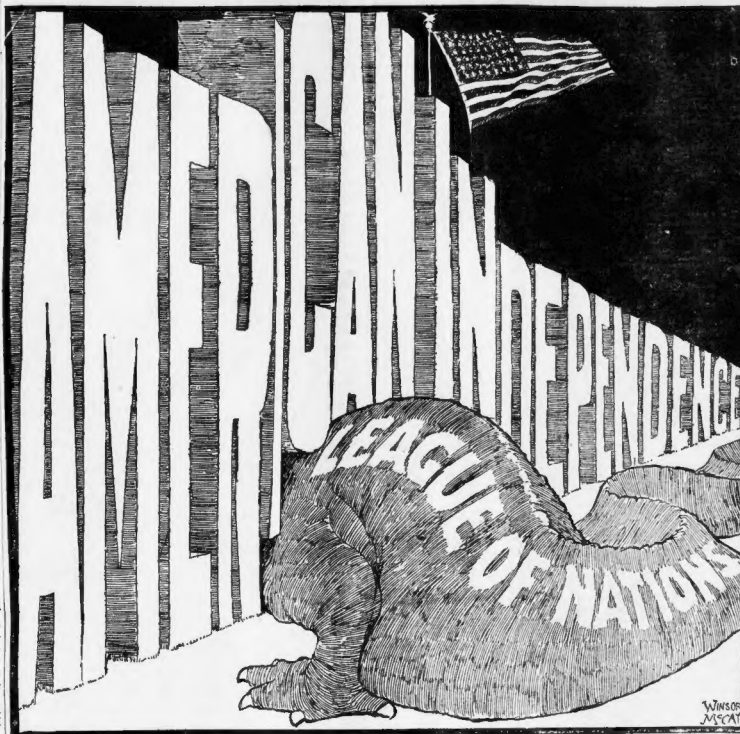

These two conditions—great prosperity at the top, for a few, and the moral equivalent of slavery for the many at the bottom—do not make for the public welfare.

Wherever they have existed they have produced bitterness, strikes, wars.

The Industrial Relations Department of the Interchurch World Movement has history behind it in predicting that there will be another and a bigger steel strike if these policies are continued.

Still Burrowing

Copyright, 1920, Star Company.

THE more desperate the plight of Europe's imperialists becomes, on account of prolonged war, intolerable taxes, pestilence, famine and popular revolt, the more desperately they will intrigue to get American men and money to back their

greedy games.

What you see in this picture is what you need to guard against with ceaseless vigilance till the whole project of the League of Nations, as now framed, is dead beyond doubt.

More Truth Than Poetry

George Explains the Family's Wishes

By S. E. KISER

If you could have one wish to make, and that one would come true,

I guess he'd wish that he could take a month's rest—maybe two.

But we could not waste wishes on vacations or such things—

I mean if she had only one—nor clo's nor diamond rings.

She wouldn't wish that we were free from bills to fret about;

She'd wish that she was thirty-three, and wasn't getting stout.

If some one offered Sister Bess one wish that she could get,

It wouldn't take me long to guess what it would be, I'll bet;

She wouldn't wish that she could have more beauty than she's got,

Because she thinks she's lovely now—I don't say that she's not;

She wouldn't wish that she could land the prize in any sport—

She'd wish she had a title and was introduced at court.

If I could have my wish, gee whizz! I'll say it wouldn't take me long to tell you what it is—it's one I often make.

I wouldn't wish the girls would all be flockin' where I wuz;

I'd wish that I could bat the ball as hard as Babe Ruth does.

And every time I went to bat I'd knock it past the fence—

When people make a wish like that it shows they got some sense,

Letters to the Editor

Pies and Other Things

Editor Boston American:

I am pleased to read your article in the American on the one item (Pie), which is only a small part of the ruthless profiteering carried on by the lunch rooms in this city and suburbs. To me this class of robbery seems the most detestable of the list of profiteers.

Many thousands of our young men and women are forced to patronize these lunch rooms. Their income prohibits patronizing the hotels where they must spend at least \$1.50, but where, could they afford to do so, they would secure for it at least \$2.00 in food value as compared to what they receive at the lunch rooms. If this line of public abuse is allowed to continue it means that the combination of our young men and women are forced to live in a way which results in an anemic, half-nourished people, having a low percentage of efficiency, who in turn become the parents of our coming generation.

How long are we going to let this money-crazed combination continue to destroy the manhood and strength of our nation? We have prohibition because the majority of the people believe the sale of alcoholic liquors impaired the health and efficiency of the people using it. I believe that the combined physical deterioration caused by alcohol, multiplied by ten, would not equal that caused by forced starvation, being imposed on certain classes of our people. Yours very truly,

DR. H. D. HUTCHINS,

Boston, Mass.

Ye Towne Gossip

Reprinted U. S. Patent Office.

By K. C. B.

I WAS trailing along, AND I recalled.

BEHIND A truck, THAT A friend of mine.

ONCE ON a time.

HAD A feathered fowl, OF THE sterner sex.

AND HE called it Ab.

AND I knew Ab.

FROM the curly Spring.

WHEN HE first appeared.

AS A little chick.

AND I liked Ab.

IN SPITE of the fact.

THAT HE had no feathers.

ON HIS neck.

AND WAS bald elsewhere.

AND VERY red.

AND ONE Sunday.

WE WERE there to dine.

AND CHICKENS were served.

AND MY friend's little girl.

PIPED UP and said.

"WE'RE EATING Ab."

AND I think I suggested.

AND I'm worried now.

FOR FEAR that he.

WILL BE served to me.

BECAUSE WE'RE going to have chicken.

TOMORROW NIGHT.

SEEMED to say with me.

THANK YOU.

MANY TASKS PERFORMED BY JUDGE ADVOCATE

By Colonel Lewis E. Goodier,
Judge Advocate of Northeastern
Department

THE function of the Judge Advocate-General's Department is to act as the legal adviser and counselor of the military command, when called upon, in the ordinary administration of its business. The army has no standing courts, no permanent judges, no district attorneys, no committing magistrates.

When an offense is committed and the perpetrator discovered, it becomes the duty of officers who happen at the time to be assigned to certain duties to take certain steps, as do the police, to arrest, investigate and prefer the charge or complaint. Another officer appoints the equivalent of the magistrate's court, and sends the case to it, or holds the offender for the action of the general in command.

The latter, after the manner of a grand jury, must look into the matter carefully, and decide whether the accused should be put upon his trial, or organized a court, composed of officers that happen to be available, assigns one to act as the prosecuting officer, and orders the case to be disposed of by the tribunal so called into being. receives its report of the trial, approves, modifies or disapproves the findings and judgment, and since they have no force or validity until his approval is given, orders the execution thereof.

The object of all this was formerly considered to be the maintenance of discipline and the better to carry on the army's work of national defense and prevention of interference with such task by the failure or refusal of its rank and file to do their work, riding list of those who could not or would not make good. But a change has taken place, and the army charged under recent legislation with the task of reforming, upbuilding and rehabilitating any weak and unfit material finding its way into the ranks.

These laws have greatly refined and complicated the procedure of courts-martial and made necessary a corps of 115 Judge advocates of the regular army to supervise and conduct the procedure. Before the European war there were but 13. Even this increase may prove insufficient to make certain that those who act as prosecutors, magistrates and judges, being without training as lawyers, will observe all the technical safeguards and requirements of recent legislation.

Stars and Stripes

Women are now liable for jury duty in Great Britain, which is not to west with the same about and bullying cross-examiners cultivate snapper methods.

Never disputes the man who knows it all. Just marvel at his diffidence.

What if Germany really can't pay? Would another war improve matters?

The merry pastime of counting electrical wires has become a fact in the fascination of solitaire—before election.

One of the troubles with a one-track mind is the fact that it is switched without going into the ditch.

A billion dollars, intended for road improvements this year, are dormant because the needed materials can't be shipped. Why not ship by truck and repair as you go?

How noble is man! He has raised himself high. He calls his power to think: Still people keep sneaking up alleys to try to buy goodness at a dollar a drink.

A Japanese newspaper says Trotsky is dead. Yet or again?

Will White, of Kansas, must have called him. He calls the Republican platform revolutionary?

He who is rich gets richer robbed; and he who tries hazards cards of promise and sometimes sudden gain.

Mysterians are the moves of fate Upon this wondrous end: You and our nation must decide The Mysterians and the God.

SCIENTISTS BROUGHT CLOSE TO NATURE

By Edgar Lucien Larkin,
Director of Mt. Lowe Observatory,

G sapphires and pearls and invest the proceeds in the new type ultra-ultra-violet light microscope and an ultra-ultra-violet energy wave parabolic mirror telescope, armed with a new pattern spectro-heliograph and a highly sensitive plate photographic apparatus.

Get a flar micrometer and electrically lighted series of cross spider's threads in the exact optical focus of the great objective, or mirror. This outfit will not be complete without a modern research spectroscope with a diffraction grating ruled to 20,000 to the inch.

Apply to this a very delicate photographic camera with ultra-rapid lenses and plates for photographing spectra of our own and thousands of other suns, making permanent record of their spectral lines and bands.

Get large plates for photographing areas of the sky of several square degrees and photograph all night. Invest in the new type micrometrical measuring machine to very accurately measure positions on the negative of all its very minute points, many being as small as the points of sewing needles, the smallest male; each point being the photographic image of a huge sun, thousands being larger than our own.

Get a photographic sensitive to very minute variations in the light received from remote suns. Measure during dark clear nights and photograph the light for storing away negatives for future reference. You will thus discover many variable suns.

Take a plate out of the vault that had been taken one or several years ago and upon it place a plate of the same size and in the sky, that you have just taken. Then, if any star-image is not precisely over that below, you know that the star has moved, and you will be a discoverer of stellar proper motions, a distinguished branch of modern astronomy.

Photograph the newly discovered spiral nebulae with long exposure by the ultra telescope driven from east to west with the same about speed that the earth rotates from west to east, only accomplished by the new perfect timing driving clocks, and store the delicate photographs in a food and fireproof building so that coming astronomers, really astrophysicists, can compare with theirs. Then changes can be detected and new points, such as the nucleus of a forming sun condensing from the colossal masses of mist. Some are a mile or more larger than our entire solar system, which is 5,500,000,000 miles in diameter.

Go boy and set up all these instruments and use them, then you will be in the direct presence of Nature's finer forces, and be not near to Nature's heart, but within. Your own nature would change, and you would be a new being mentally and some add psychologically.

Get the new highly sensitive barometers, thermometers, barographs, anemometers, photometers, electrically driven recording chronographs, and, not least, a modern time clock with new type compensating pendulum. Put it in a hermetically sealed case and pump out all the air you can with a new type of air-pump, whose piston is made of drops of mercury. The air must be out so as to avoid friction against the pendulum; get a good clock and the time will vary between the limits of 0.1 to 0.01 seconds per month.
